Dear John, *JWC*

I was much impressed with George. He has an uncommon amount of common sense. At first he seemed a little reticent about picking up the marbles, but by the end of his trip he was moving right in on the problems and grappling with them.

Goerge and I visited the [] office. [] was saying they have a very difficult communications problem. It is very hard for them to keep posted on activities.

We spent a very profitable 2 hours discussing a whole series of contracts, mostly [] which have some clean up action required. Both [] felt they could clear up a lot of outstanding questions.

I'll be going to [] on Thurs. July 26. I suspect the move will delay delivery of the Viewer. I'll try to get some fix on when to expect it to be completed.

I haven't scheduled any other trips to [] etc. Let me know if you think I should go up there again in August.

If you have any information on the [] Laser printer proposal for the Image Enhancer, please keep me posted. I suspect it will be late Sept before that contract gets under way.

I'm doing some work for [] on a consulting basis, so business is pretty good.

If you would like me to send a copy of any of my reports to [] let me know their mailing address.

Regards,
Phil.

I will have staff study on [] Laser optical Printer Program on its way by mid September.

KPX.

Is this our contracting office?
STAT

did say he was having difficulties with communications. I will start calling him about once a week for a while to keep him advised.

KPX.
